DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 24 and 25 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 24 and 25 are directed towards a computer readable medium containing instructions which, when executed in a system, cause said system to perform the method recited in claims 21 and 22 respectively. Nowhere in the specification is a computer readable medium storing the implementation of claimed method claims 21 and 22 supported for the claims 24 and 25 which were added in the amendment filed 19 May 2005.

Allowable Subject Matter

3. Claims 1-23 are allowed as previously indicated.

Response to Arguments

4. Applicant's arguments filed pages 6 and 7 of amendment filed 29 April 2008 have been fully considered but they are not persuasive. The Applicant argues the specification supports the computer readable medium, specifically pointing to figure 1 with the exception handler 13 and code 13A. The Examiner respectfully disagrees. Claims 24 and 25 are implementations of claims 21 and 22 respectively. Claim 21 includes steps of activating the exception handler, therefore the computer readable medium of claims 24 and 25 must include instructions for more than just the exception handler. They must include instructions that use the exception handler. There is no support in the specification directed towards a computer readable medium containing instructions which, when executed in a system, cause said system to perform the method recited in claims 21 and 22 respectively.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
